Dhaka, Bangladesh

Summary

Full Stack Developer with hands-on experience building scalable web applications using React, Next.js, Node.js, and modern databases. Passionate about clean architecture, problem-solving, and delivering production-ready solutions. Seeking a developer role where I can contribute to production-level systems, grow as an engineer, and take on increasing responsibility.

Technical Skills

Expertise: JavaScript, TypeScript, React, Next.js, Node.js, Express.js, REST APIs, JWT Authentication, MongoDB, PostgreSQL, Prisma, Tailwind CSS.

Comfortable: Redux, RDBMS Concepts.

Familiar: Firebase, Performance Optimization, Basic System Design.

Tools: Git, Github, VS Code, Figma.

Soft Skills

Self-Motivated, Quick Learner, Active Listening, Responsibility, Time Management, Adaptability, Critical Thinking.

Projects

Turf Management System — *Full Stack Application*

Overview: A platform that allows users to book sports turfs and enables owners to manage bookings, profiles, and earnings.

Key Features:

- Built user and turf-owner authentication with secure booking workflows.
- Implemented dynamic booking management with real-time availability using Next.js and Prisma.
- Designed relational database structure using PostgreSQL to manage users, turfs, and bookings efficiently.

Technologies: TypeScript, Next.js, React, Node.js, Express.js, PostgreSQL, Prisma

Digital Wallet System — *Full Stack Application*

Overview: A system supporting users, agents, and admins with secure financial transactions and role-based access.

Key Features:

- Developed JWT-based authentication and role-based authorization for users, agents, and admins.
- Implemented cash-in, cash-out, send money, and transaction history with validation across frontend and backend.
- Designed and integrated a scalable MongoDB-based data model to ensure secure and consistent transactions.

Technologies: React, Node.js, Express.js, MongoDB, JWT Authentication, Role-Based Access Control
